High-quality early childhood education (ECE) is proven to dramatically improve a child’s opportunities for a better future—particularly children from low-income families—while offering parents improved job stability and overall economic security. Research shows that every $1 invested in the education and care of children from birth through age five generates $7.30 in return for our country. To ensure all children can access high-quality early learning and care, the federal government partners with states to support local efforts and innovations.

Over time, ECE programs have been created to meet the diverse needs of children and families. A 2017 Government Accountability Office (GAO) report found that these programs work in conjunction to benefit those they serve.

Much of the progress at the state and local level has been made possible by strong partnerships with the federal government aimed at expanding access and increasing quality for more children. Many state and community programs are funded exclusively with federal dollars, while others leverage federal funding to create and expand high-quality early learning and care opportunities beyond what is possible with state funding alone. The purpose of this resource is to provide a snapshot of what ECE looks like in Florida. To learn more about the specific programs we reference here, read FFYF’s ABCs of Federal Early Learning and Care Funding Streams resource.

1 This figure includes beneficiaries of Head Start, Early Head Start, CCDF, MIECHV, state-funded Pre-K, and IDEA Parts B Sec. 619 and C. In some cases, children and families are served by more than one program.
Federal and State Early Childhood Education Funding in Florida

- **Head Start and Early Head Start** $377 M
- **CCDBG and Mandatory Funds** $443.8 M
- **CCDBG State Match** $591.1 M
- **State-Funded Pre-K** $380 M
- **TANF** Funds transferred to early learning and care $318.2 M
- **MIECHV** $10.2 M
- **Preschool Development Grant Birth Through Five** $8.5 M
- **IDEA Part C** $25.2 M
- **IDEA Part B, Sec. 619** $18.6 M

Early Childhood Education and the Florida Economy

There are 844,511 children under age six with all available parents in the workforce. In addition to the significant impact of early childhood education on children and families in the short and long term, early learning and care can have an immediate impact on state economies. Access to affordable child care can increase labor force participation and support parents seeking additional education and training, which contributes to higher earnings over an individual's lifetime.

**Lack of Supply and High Cost of Care Challenging for Working Families**

The cost of care in Florida remains a hurdle for many parents who wish to enter or remain in the workforce. Limited access to high-quality, affordable child care presents an additional challenge for working families.

In Florida, an estimated 119,827 JOBS are sustained by the child care sector.

$9,018 is the average annual cost of center-based infant care in Florida.

11.8% of the state median income

$7,779 is the average annual cost of home-based infant care
