

In South Carolina, state and federally funded early childhood opportunities served more than 66,474 children and families.¹

High-quality early childhood education (ECE) is proven to dramatically improve a child's opportunities for a better future - particularly children from low-income families - while offering parents improved job stability and overall economic security. Research has shown an annual 13% return on investment per child through better education, economic, health, and social outcomes. To ensure all children can access high-quality early learning and care, the federal government partners with states to support local efforts and innovations.

Over time, ECE programs have been created to meet the diverse needs of children and families. A 2017 Government Accountability Office (GAO) report found that these programs work in conjunction to benefit those they serve.

Much of the progress at the state and local level has been made possible by strong partnerships with the federal government aimed at expanding access and increasing quality for more children. Many state and community programs are funded exclusively with federal dollars, while others leverage federal funding to create and expand high-quality early learning and care opportunities beyond what is possible with state funding alone. This resource provides a snapshot of what ECE looks like in South Carolina. To learn more about the specific programs referenced, read [FFYF's ABCs of Federal Early Learning and Care Funding Streams](#) resource.

¹ This figure includes beneficiaries of Head Start, Early Head Start, CCDF, MIECHV, state-funded Pre-K, and IDEA Parts B Sec. 619 and C. In some cases, children and families are served by more than one program.

Note: The data and information in this resource relies on reporting from prior to the COVID-19 pandemic.

SOUTH CAROLINA QUICK FACTS

Population Under Six ²	366,581
Under Six Living in Poverty ³	26.05%

Early Childhood Education and the South Carolina Economy

In South Carolina, there are 226,950 children under age six with all available parents in the workforce.²⁴ In addition to the significant impact of early childhood education on children and families in the short and long term, early learning and care can have an immediate impact on state economies. Access to affordable child care can increase labor force participation and support parents seeking additional education and training, which contributes to higher earnings over an individual's lifetime.

In South Carolina, an estimated

24,492 JOBS

are sustained by the child care sector.

25

Lack of Supply and High Cost of Care Challenging for Working Families

The cost of care in South Carolina remains a hurdle for many parents who wish to enter or remain in the workforce. Limited access to high-quality, affordable child care presents an additional challenge for working families.

\$9,100

is the average annual cost of center-based infant care in South Carolina.

11.2%

of the state median income

26, 27

In South Carolina, the child care industry has an estimated

ECONOMIC IMPACT OF \$973 M

including revenue generated by child care providers and spillover or related productivity in other sectors.

30

In South Carolina,

42%

of residents live in a "child care desert."

29

\$5,720

is the average annual cost of home-based infant care in South Carolina.
