

Early Childhood Education in Washington

In Washington, state and federally funded early childhood opportunities served more than 81,963 children and families.¹

High-quality early childhood education (ECE) is proven to dramatically improve a child's opportunities for a better future - particularly children from low-income families - while offering parents improved job stability and overall economic security. Research has shown an annual 13% return on investment per child through better education, economic, health, and social outcomes. To ensure all children can access high-quality early learning and care, the federal government partners with states to support local efforts and innovations.

Over time, ECE programs have been created to meet the diverse needs of children and families. A 2017 Government Accountability Office (GAO) report found that these programs work in conjunction to benefit those they serve.

Much of the progress at the state and local level has been made possible by strong partnerships with the federal government aimed at expanding access and increasing quality for more children. Many state and community programs are funded exclusively with federal dollars, while others leverage federal funding to create and expand high-quality early learning and care opportunities beyond what is possible with state funding alone. This resource provides a snapshot of what ECE looks like in Washington. To learn more about the specific programs referenced, read [FFYF's ABCs of Federal Early Learning and Care Funding Streams](#) resource.

¹ This figure includes beneficiaries of Head Start, Early Head Start, CCDF, MIECHV, state-funded Pre-K, and IDEA Parts B Sec. 619 and C. In some cases, children and families are served by more than one program.

Note: The data and information in this resource relies on reporting from prior to the COVID-19 pandemic.

Early Childhood Education and the Washington Economy

In Washington, there are 324,006 children under age six with all available parents in the workforce.²⁴ In addition to the significant impact of early childhood education on children and families in the short and long term, early learning and care can have an immediate impact on state economies. Access to affordable child care can increase labor force participation and support parents seeking additional education and training, which contributes to higher earnings over an individual's lifetime.

In Washington, an estimated
37,027 JOBS
 are sustained by the
 child care sector. 25

Lack of Supply and High Cost of Care Challenging for Working Families

The cost of care in Washington remains a hurdle for many parents who wish to enter or remain in the workforce. Limited access to high-quality, affordable child care presents an additional challenge for working families. Simultaneously, the supply of home-based care, which is often the more affordable and flexible option, has decreased since 2010.

\$14,844
 is the average annual cost of
 center-based infant care in Washington.
15.3% of the state
 median income 26, 27

In Washington, the child care industry has an estimated
ECONOMIC IMPACT OF
\$2.01 B
 including revenue generated
 by child care providers and
 spillover or related productivity
 in other sectors. 31

In Washington,
63%
 of residents live in a
 "child care desert." 30

\$11,208
 is the average annual cost of
 home-based infant care in Washington.
17.4% decline in
 availability of
 home-based
 care from 2010
 to 2016. 28, 29
