Early Childhood Education in Idaho

State- and federally-funded early childhood opportunities serve more than 15,422 children and families in Idaho.¹

High-quality early childhood education (ECE) is proven to dramatically improve a child's opportunities for a better future - particularly children from low-income families - while offering parents improved job stability and overall economic security. Research has shown an annual 13% return on investment per child through better education, economic, health, and social outcomes.

Much of the progress at the state and local level has been made possible by strong partnerships with the federal government aimed at expanding access and increasing quality for more children. Many state and community programs are funded exclusively with federal dollars, while others leverage federal funding to offer high-quality early learning and care opportunities beyond what is possible with state funding alone.

At current funding levels, however, these programs reach only a fraction of the population they are intended to serve. A significant, sustained federal investment is needed to build a system of care that ensures all working families who need it can access affordable, high-quality options that work for them.

The COVID-19 pandemic demonstrated both the essential role of the early learning sector and the critical need for federal support to sustain it. [The Child Care and Development Block Grant \(CCDBG\)](#), for example, was key to providing relief to child care providers and ensuring access to care for thousands of working families. States have discretion and [varying timelines](#) for spending and reporting on the use of these funds. Consequently, that information is not included here.

IDAHO QUICK FACTS

Population Under Six ²	138,701
Under Six Living in Poverty ³	19.75%
Children Enrolled in Head Start ⁴	3,209
Eligible Children Served by Head Start ⁵	19.56%
Children Enrolled in Early Head Start ⁶	737
Eligible Children Served by Early Head Start ⁷	4.72%
Children Under Six Served by CCDBG and Mandatory Funds ⁸	4,690
Eligible Children Under Six Served by CCDBG and Mandatory Funds ⁹	6.20%
Families Served by the Maternal, Infant, and Early Childhood Home Visiting Program (MIECHV) ¹⁰	537
Children Served by the Individuals with Disabilities Education Act (IDEA) Part C ¹¹	2,143
Children Served by IDEA Part B, Sec. 619 ¹²	4,106

IDEA Part C ²⁰	● \$2.6 M
IDEA Part B, Sec. 619 ²¹	● \$2.3 M

Early Childhood Education and the Idaho Economy

62%
OF CHILDREN UNDER SIX

In Idaho, 62% of children under six have all available parents in the workforce.²²

10%
OF THREE AND FOUR YEAR OLDS

10% of three- and four-year-old children attend public ECE.²³

In addition to the significant impact of early childhood education on children and families in the short and long term, early learning and care can have an immediate impact on state economies. Access to affordable child care can increase labor force participation and support parents seeking additional education and training, which contributes to higher earnings over an individual's lifetime.

In Idaho, the child care industry has an estimated economic impact of \$243 million, including revenue generated by child care providers and spillover or related productivity in other sectors.²⁴

An estimated 7,426 jobs are sustained by the child care sector.²⁵

Lack Of Supply and the High Cost of Care Challenging for Working Families

Limited access to high-quality child care presents a tremendous challenge for working families, and too often, the care that is available costs more than families can afford.

49%
OF RESIDENTS

49% of Idaho residents live in a "child care desert."²⁶

\$8,791

\$8,791 is the average annual cost of center-based infant care,²⁷ 11% of the state median income.²⁸

\$7,529

\$7,529 is the average annual cost of home-based infant care.²⁹

The pandemic only exacerbated these long-standing issues as many providers, who under normal circumstances operated on razor-thin margins, were forced to close in the face of increased costs and declining revenue. Prior to the pandemic, [160,000 openings](#) for child care workers were projected annually, and between February 2020 and June 2021, an additional [115,000](#) child care sector jobs were lost and still have not been recovered.
