### Early Childhood Education Economic Impact

In addition to the benefits to young children, access to affordable, highquality child care can increase parental labor force participation and family economic stability. Child care problems, however, adversely affect both state and national economies. As a direct result of child care issues, the national economy loses upward of \$57 billion annually in the form of lost earnings, productivity, and revenue.<sup>15</sup>

# In Florida

13.6% of parents make career sacrifices due to child care issues.<sup>16</sup>

Labor force participation of mothers with children under the age of 5 increased from 60.7% in 2019 to 65.0% in 2021.<sup>17</sup>

### Nationwide<sup>18</sup>

The percent of families that reported difficulty finding space in a home- or center-based program increased dramatically from 22% in December 2021 to 58% in January 2022.

71% of parents report that difficulty finding child care has impacted their ability to work.
