Early Childhood Education Economic Impact

In addition to the benefits to young children, access to affordable, high-quality child care can increase parental labor force participation and family economic stability. Child care problems, however, adversely affect both state and national economies. As a direct result of child care issues, the national economy loses upward of \$57 billion annually in the form of lost earnings, productivity, and revenue.¹⁵

In Michigan

14.4% of parents make career sacrifices due to child care issues.¹⁶

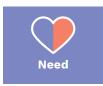

Labor force participation of mothers with children under the age of 5 decreased from 71.4% in 2019 to 68.4% in 2021.¹⁷

Nationwide¹⁸

The percent of families that reported difficulty finding space in a home- or center-based program increased dramatically from 22% in December 2021 to 58% in January 2022.

71% of parents report that difficulty finding child care has impacted their ability to work.

Michigan Early Learning and Care Snapshot

- Population Under Six: 682.854³⁰
- Under Six Living in Poverty: 21.10%31
- 64.65% of children under six have all available parents in the workforce³²

- 44% of Michigan residents live in a "child care desert"33
- For Black families and families with low incomes, this percentage is even higher³⁴

- The average price of child care is \$10,291 per year³⁵
- The median household income is \$96,98336

• Met 10/10 of NIEER's State Preschool Quality Standards37

High Price of Care38

Too often, the care that is available costs more than families can afford.
