Early Childhood Education Economic Impact

In addition to the benefits to young children, access to affordable, high-quality child care can increase parental labor force participation and family economic stability. Child care problems, however, adversely affect both state and national economies. As a direct result of child care issues, the national economy loses upward of \$57 billion annually in the form of lost earnings, productivity, and revenue.¹⁴

In Ohio

10.5% of parents make career sacrifices due to child care issues.¹⁵

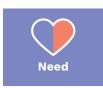

Labor force participation of mothers with children under the age of 5 decreased from 69.1% in 2019 to 62.4% in 2021.16

Nationwide¹⁷

The percent of families that reported difficulty finding space in a home- or center-based program increased dramatically from 22% in December 2021 to 58% in January 2022.

71% of parents report that difficulty finding child care has impacted their ability to work.

Ohio Early Learning and Care Snapshot

- Population Under Six: 826.058²⁹
- Under Six Living in Poverty: 21.40%30
- 66.63% of children under six have all available parents in the workforce³¹

- 39% of Ohio residents live in a "child care desert"³²
- For rural families, this percentage is even higher³³

- The average price of child care is \$8,361 per year³⁴
- The median household income is \$98,574³⁵

 Met 5/10 of NIEER's State Preschool Quality Standards³⁶

High Price of Care³⁷

Too often, the care that is available costs more than families can afford.
