Early Childhood Education Economic Impact

In addition to the benefits to young children, access to affordable, high-quality child care can increase parental labor force participation and family economic stability. Child care problems, however, adversely affect both state and national economies. As a direct result of child care issues, the national economy loses upward of \$57 billion annually in the form of lost earnings, productivity, and revenue.¹⁵

In Washington

9.7% of parents make career sacrifices due to child care issues.¹⁶

Labor force participation of mothers with children under the age of 5 increased from 60.3% in 2019 to 72.7% in 2021.¹⁷

Nationwide¹⁸

The percent of families that reported difficulty finding space in a home- or center-based program increased dramatically from 22% in December 2021 to 58% in January 2022.

71% of parents report that difficulty finding child care has impacted their ability to work.

Washington Early Learning and Care Snapshot

- Population Under Six: 544.854³⁰
- Under Six Living in Poverty: 12.99%31
- 58.72% of children under six have all available parents in the workforce³²

- 63% of Washington residents live in a "child care desert" 33
- For Hispanics/Latinos and families with low incomes, this percentage is even higher³⁴

- The average price of child care is \$13,530 per year³⁵
- The median household income is \$107,749³⁶

 Met 9/10 of NIEER's State Preschool Quality Standards³⁷

High Price of Care38

Too often, the care that is available costs more than families can afford.
