

Child Care & Development Block Grant in Arizona

The Child Care & Development Block Grant (CCDBG) is the primary federal grant program that allows states to provide child care assistance to low-income working families with children under age 13.

The majority of these funds serve children 6 years or younger, with the remainder supporting care for older children during out-of-school time.

Subsidies help remove barriers to affordable, high-quality child care, whether in center- or home-based settings. They give working parents the ability to access quality care and choose the type of care that works best for them. The majority of funds go directly to providing early learning experiences, but states can also use the funding to:

- Recruit and retain a well-qualified, fairly compensated, and effective workforce
- Support continuous quality improvement
- Meet the child care needs of families working nontraditional hours

How CCDBG Funds Flow

Using an established federal formula, states, territories, and tribal entities receive grant awards from the Department of Health and Human Services, Administration for Children and Families (ACF).

- **Parents**
Families can use vouchers to help cover the cost of care if a provider/program agrees to accept them.
- **Providers**
Grants and contracts represent agreements between the subsidy program and child care providers to designate slots for subsidy-eligible children.

In Arizona, **31%** of children ages 0-6 are eligible for a CCDBG subsidy under federal rules on average each month.¹²

However, of these children **88%** are **not served** due to insufficient federal funding.¹³

CCDBG by the Numbers in Arizona

516,537 Children Under 6¹

59% Population Under 6 with All Parents in the Workforce²

21,798 Children Ages 0-6 Served by CCDBG and Mandatory Funds³

2,452 Providers Accepting CCDBG Subsidies⁴

63% Children Currently Served by CCDBG Who Are Under the Age of 6⁵

\$196,589,518 CCDBG and Mandatory Funds⁶

\$11,547,660 CCDBG State Match⁷

\$1,305,218,646 CCDBG COVID-Relief Allocations: CARES⁸ | CRRSA⁹ | ARPA (CCDF + Stabilization)¹⁰

\$0 TANF Transferred to CCDBG¹¹

Income Eligibility

Given CCDBG is a federal block grant, state Lead Agencies have the flexibility to design their own subsidy programs in compliance with established eligibility and quality requirements and may choose to set their own additional requirements.

The Lead Agency in Arizona is the Arizona Department of Economic Security.

Families that meet income eligibility and work/job training/education requirements can apply to the Lead Agency for a subsidy. Many families are required to pay a copay, but states may waive those requirements. Families who receive a subsidy may choose any participating child care provider, including center-based care (including faith-based programs), home-based care, and in-home care.

In Arizona, eligibility is capped at 58% of State Median Income (SMI). This means that a family of 3 is eligible for a subsidy if they make: \$2,809 or less per month (\$33,708 per year).¹⁴

Receiving subsidies results in much lower out-of-pocket costs for families.

In Arizona, a family receiving a CCDBG subsidy pays between

out-of-pocket per month¹⁵

Families that don't receive subsidies pay significantly higher costs.

For instance, center-based infant care ranges in price from:¹⁶

in La Paz County per month

in Maricopa County per month

Provider Reimbursements

ACF recommends that Lead Agencies set provider reimbursement rates at the 75th percentile of the market rate.¹⁸ This is the price the lowest 75% of child care programs included in the market rate survey reported charging.

However, market rates often do not reflect the actual costs of providing high-quality care as programs must charge what families can afford in order to fill slots. Therefore, there is a significant gap between how much providers are reimbursed and how much it costs to provide care. Find answers to the most frequently asked questions about provider reimbursement rates [here](#).

Provider Reimbursement Rates in Arizona¹⁹
In percentiles of market rate

In Arizona, infant and toddler providers are reimbursed at the federally recommended rate, but preschool providers are reimbursed at a lower rate than recommended. Low payment rates make it difficult for providers to stay financially afloat and provide high-quality learning experiences. They also force low- and middle-income working families to pay higher child care fees to compensate.

CCDBG in COVID-19 Relief

Throughout the pandemic, there was strong bipartisan support for federal relief funding to keep the child care sector afloat. CCDBG was the primary mechanism for providing this relief to child care providers and ensuring access to child care for thousands of working families through CARES, CRRSA, and ARPA. As of December 31, 2022:²⁰

2,970 child care programs in Arizona received American Rescue Plan Stabilization support, impacting up to 257,600 children.

Providers in 100% of Arizona counties have received funds, including:

1,995
child care centers

Most common use of funds:
Personnel costs and keeping programs staffed.

975
family child care homes

Most common use of funds:
Rent and mortgage payments, typically their largest operating expense.

American Rescue Plan Act Spending Spotlight²¹

Funds have been used to directly support child care providers to cover increased costs and challenges due to COVID-19. The Child Care Stabilization Grant (CCSG) Program provided funding for personnel costs including payroll/wage supplements, bonuses, and employee benefits.

Federal pandemic relief funding, which buttressed an already struggling child care market, expires in September 2024. As this temporary funding expires, Congress must come together to strengthen and invest in our federal early learning and care programs so families can access the reliable, high-quality, affordable child care they depend on.
