The Child Care & Development Block Grant (CCDBG) is the primary federal grant program that allows states to provide child care assistance to low-income working families with children under age 13. The majority of these funds serve children 6 years or younger, with the remainder supporting care for older children during out-of-school time.

Subsidies help remove barriers to affordable, high-quality child care, whether in center- or home-based settings. They give working parents the ability to access quality care and choose the type of care that works best for them. The majority of funds go directly to providing early learning experiences, but states can also use the funding to:
- Recruit and retain a well-qualified, fairly compensated, and effective workforce
- Support continuous quality improvement
- Meet the child care needs of families working nontraditional hours

How CCDBG Funds Flow

Using an established federal formula, states, territories, and tribal entities receive grant awards from the Department of Health and Human Services, Administration for Children and Families (ACF).

**Parents**

- Families can use vouchers to help cover the cost of care if a provider/program agrees to accept them.

**Providers**

- Grants and contracts represent agreements between the subsidy program and child care providers to designate slots for subsidy-eligible children.

In Colorado, 32% of children ages 0-6 are eligible for a CCDBG subsidy under federal rules on average each month. However, of these children 91% are not served due to insufficient federal funding.

Income Eligibility

Given CCDBG is a federal block grant, state Lead Agencies have the flexibility to design their own subsidy programs in compliance with established eligibility and quality requirements and may choose to set their own additional requirements.

The Lead Agency in Colorado is the Colorado Department of Human Services.

Families that meet income eligibility and work/job training/education requirements can apply to the Lead Agency for a subsidy. Many families are required to pay a copay, but states may waive those requirements. Families who receive a subsidy may choose any participating child care provider, including center-based care (including faith-based programs), home-based care, and in-home care.

In Colorado, eligibility is capped at 61% of State Median Income (SMI). This means that a family of 3 is eligible for a subsidy if they make: $3,895 or less per month ($46,743 per year).

CCDBG by the Numbers in Colorado

- 398,626 Children Under 6
- 63% Population Under 6 with All Parents in the Workforce
- 11,286 Children Ages 0-6 Served by CCDBG and Mandatory Funds
- 1,891 Providers Accepting CCDBG Subsidies
- 66% Children Currently Served by CCDBG Who Are Under the Age of 6
- $105,582,656 CCDBG and Mandatory Funds
- $22,093,884 CCDBG State Match
- $626,462,243 CCDBG COVID-Relief Allocations: CARES | CRRSA | ARPA (CCDF + Stabilization)
- $1,048,581 TANF Transferred to CCDBG

Income Eligibility

- Families that meet income eligibility and work/job training/education requirements can apply to the Lead Agency for a subsidy. Many families are required to pay a copay, but states may waive those requirements. Families who receive a subsidy may choose any participating child care provider, including center-based care (including faith-based programs), home-based care, and in-home care.

In Colorado, eligibility is capped at 61% of State Median Income (SMI). This means that a family of 3 is eligible for a subsidy if they make: $3,895 or less per month ($46,743 per year).
Receiving subsidies results in much lower out-of-pocket costs for families.

In Colorado, a family receiving a CCDBG subsidy pays between $1 and $584 out-of-pocket per month.ț

Children experiencing homelessness are exempt from copayments.ț

Provider Reimbursements

ACF recommends that Lead Agencies set provider reimbursement rates at the 75th percentile of the market rate.ț This is the price the lowest 75% of child care programs included in the market rate survey reported charging.

However, market rates often do not reflect the actual costs of providing high-quality care as programs must charge what families can afford in order to fill slots. Therefore, there is a significant gap between how much providers are reimbursed and how much it costs to provide care. Find answers to the most frequently asked questions about provider reimbursement rates here.

In Colorado, providers are reimbursed at a far lower rate than recommended by the federal government. Low payment rates make it difficult for providers to stay financially afloat and provide high-quality learning experiences. They also force low- and middle-income working families to pay higher child care fees to compensate.

CCDBG in COVID-19 Relief

Throughout the pandemic, there was strong bipartisan support for federal relief funding to keep the child care sector afloat. CCDBG was the primary mechanism for providing this relief to child care providers and ensuring access to child care for thousands of working families through CARES, CRRSA, and ARPA.

As of December 31, 2022:ț

3,475 child care programs in Colorado received American Rescue Plan Stabilization support, impacting up to 265,700 children.

Providers in 98% of Colorado counties have received funds, including:

- 2,410 child care centers
- 1,065 family child care homes

Most common use of funds:
- Personnel costs and keeping programs staffed.
- Rent and mortgage payments, typically their largest operating expense.

American Rescue Plan Act Spending Spotlightț, ț

Funds have been used to support and stabilize the workforce through increased employee compensation, retention bonuses, professional development, and hiring additional staff while offsetting operational expenses for child care programs.

Federal pandemic relief funding, which buttressed an already struggling child care market, expires in September 2024. As this temporary funding expires, Congress must come together to strengthen and invest in our federal early learning and care programs so families can access the reliable, high-quality, affordable child care they depend on.

In Colorado, providers are reimbursed at a far lower rate than recommended by the federal government. Low payment rates make it difficult for providers to stay financially afloat and provide high-quality learning experiences. They also force low- and middle-income working families to pay higher child care fees to compensate.
