

2023 Child Care and Early Education in Hawaii

In Hawaii, federal and state early learning opportunities serve more than 8,987 children and families,¹ or 9% of children birth through age 5.²

High-quality early care and education (ECE) is proven to dramatically improve a child's opportunities for a better future while offering parents greater job stability and overall economic security.

The Economic Impact

Access to affordable, high-quality child care can increase parental labor force participation and family economic stability. However, widespread problems finding and paying for child care adversely affect both state and national economies. As a direct result of child care issues, the national economy loses \$122 billion annually in the form of lost earnings, productivity, and revenue.⁷ In Hawaii: The estimated annual economic impact of the infant-toddler child care crisis: \$476M.⁸

Families Lack Access to High-Quality ECE Options in Hawaii

The high cost and limited supply of quality ECE have created serious challenges for many families.

Unmet Need

104,003 Children Birth Through Age Five³

12% of Children Birth Through Age Five Living in Poverty⁴

61% of Children Birth Through Age Five With All Available Parents in the Workforce⁵

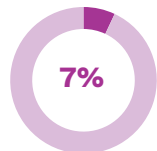

9% of Children Birth Through Age Five Served By Federal- and State-Funded Early Learning Opportunities⁶

Note: 1,2,6: These figures include beneficiaries of Head Start, Early Head Start, CCDF, MIECHV, state-funded Pre-K, and IDEA Parts B, Sec. 619 and C. In some cases, children and families are served by more than one program.

There are several early learning programs that provide working families with access to high-quality, affordable ECE opportunities, but currently the demand for care far outweighs the supply, and funding constraints leave many eligible children unserved. Each of these programs has its own eligibility requirements, purpose, and service delivery model. Together they form a mixed-delivery system that supports parental choice and aims to meet children's individual needs.

Child Care & Development Block Grant (CCDBG)

1,872 Children Birth Through Age Five Served⁹

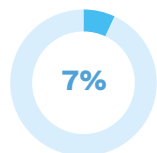

Eligible Children Birth Through Age Five Served¹⁰

Early Care and Education (ECE) in Hawaii Snapshot

Accessibility

Many families struggle to find the care they need.

- **68%** of Hawaii residents live in a “child care desert.”²⁰
- **Black families and families with low incomes** are disproportionately represented among those who live in a “child care desert.”²¹
- **1%** of children under age 3 receive early intervention services.²²

Affordability

The cost of ECE is too expensive for many families.

- The annual price of center-based infant care is **\$20,647**, and home-based infant care is **\$10,369**.²³
- Families receiving a CCDBG subsidy pay between **\$67** and **\$607** per month for one child in care.²⁴
- A two-parent household spends **12%** of their income on child care, while HHS defines spending over 7% to be a burden.²⁵

ECE Workforce

Early childhood educators have some of the lowest paying jobs in the United States, earning poverty-level wages.²⁶

- **\$31,580** child care worker annual salary (\$15.18 per hour).²⁷

Program Quality

Program quality varies substantially across and within states.

- **Met 10/10** of NIEER’s Quality Standards Benchmarks for state-funded pre-K programs. Only 5 states met all 10 benchmarks in 2022.²⁸
- **35%** of children received developmental screenings at 9, 18, and 30 months in the past year.²⁹

Federal and State ECE Funding in Hawaii

Federal funding is foundational to providing ECE.

state investment

- **\$32M** ● Head Start and Early Head Start³⁰
- **\$31.9M** ● CCDBG and Mandatory Funds³¹
- **\$3.6M** ● MIECHV³²
- **\$3.9M** ● IDEA Part C³³
- **\$1.6M** ● IDEA Part B, Sec. 619³⁴
- **\$7.4M** ● TANF Early Learning and Care Expenditures³⁵
- **\$6.6M** ● PDG B-5³⁶
- **\$6.9M** ● State-Funded Pre-K³⁷
- **\$5.8M** ● CCDBG State Match³⁸
- **\$2M** ● PDG B-5 State Match³⁹

Hawaii received an additional \$175M through COVID-19 relief.⁴⁰

Spotlight: ECE Successes in Hawaii

COVID-19 Relief:

Throughout the pandemic, there was strong bipartisan support for federal relief funding to keep the child care sector afloat.

- As a result, **680** child care programs in Hawaii received support, impacting up to **31,400** children.⁴¹
- These funds also allowed states to demonstrate what would be possible when equipped with additional resources. Funds have been used to support and stabilize the workforce through wage bonuses. Base award amount per child ranges from \$650 in A+ Programs to \$4,400 in infant/toddler centers. There is an employee retention bonus of \$2,500 and an additional \$30/hour for programs operating during nontraditional hours.*

Preschool Development Grant Birth Through Five (PDG B-5):

PDG B-5 is a competitive federal grant designed to improve states’ early childhood systems. In their 2023 renewal grant application, among other uses, Hawaii noted that they would use funding to:

- **Support more Early Head Start-Child Care Partnerships (EHS-CCPs)**, including funding two partnerships with family child care homes and one with a center-based program.
- **Promote the sustainability of family child care homes and small child care centers**, including by piloting Ka ‘Upena, a shared services program that supports managing business functions.**
