High-quality early care and education (ECE) is proven to dramatically improve a child's opportunities for a better future while offering parents greater job stability and overall economic security.

The Economic Impact
Access to affordable, high-quality child care can increase parental labor force participation and family economic stability. However, widespread problems finding and paying for child care adversely affect both state and national economies. As a direct result of child care issues, the national economy loses $122 billion annually in the form of lost earnings, productivity, and revenue.7 In Kansas: The estimated annual economic impact of the infant-toddler child care crisis: $1B.8

There are several early learning programs that provide working families with access to high-quality, affordable ECE opportunities, but currently the demand for care far outweighs the supply, and funding constraints leave many eligible children unserved. Each of these programs has its own eligibility requirements, purpose, and service delivery model. Together they form a mixed-delivery system that supports parental choice and aims to meet children's individual needs.

Families Lack Access to High-Quality ECE Options in Kansas
The high cost and limited supply of quality ECE have created serious challenges for many families.

Unmet Need
225,918 Children Birth Through Age Five3
16% of Children Birth Through Age Five Living in Poverty4
67% of Children Birth Through Age Five With All Available Parents in the Workforce5
23% of Children Birth Through Age Five Served By Federal- and State-Funded Early Learning Opportunities6

Note: 1,2,6: These figures include beneficiaries of Head Start, Early Head Start, CCDF, MIECHV, state-funded Pre-K, and IDEA Parts B, Sec. 619 and C. In some cases, children and families are served by more than one program.
Early Care and Education (ECE) in Kansas Snapshot

Accessibility

Many families struggle to find the care they need.
- 44% of Kansas residents live in a "child care desert."26
- Hispanics/Latinos and families with low incomes are disproportionately represented among those who live in a "child care desert."27
- 4% of children under age 3 receive early intervention services.22

Affordability

The cost of ECE is too expensive for many families.
- The annual price of center-based infant care is $14,223, and home-based infant care is $8,148.23
- Families receiving a CCDBG subsidy pay between $22 and $243 per month for one child in care.24
- A two-parent household spends 10% of their income on child care, while HHS defines spending over 7% to be a burden.25

ECE Workforce

Early childhood educators have some of the lowest paying jobs in the United States, earning poverty-level wages.26
- $25,570 child care worker annual salary ($12.29 per hour).27

Program Quality

Program quality varies substantially across and within states.
- Met 6/10 of NIEER’s Quality Standards Benchmarks for state-funded pre-K programs. Only 5 states met all 10 benchmarks in 2022.28
- 37% of children received developmental screenings at 9, 18, and 30 months in the past year.29

Federal and State ECE Funding in Kansas

Federal funding is foundational to providing ECE.

$82.1M ● Head Start and Early Head Start30
$77M ● CCDBG and Mandatory Funds31

$11M ● CCDBG State Match38
$1.2M ● PDG B-5 State Match39

Kansas received an additional $467M through COVID-19 relief.40

Spotlight: ECE Successes in Kansas

COVID-19 Relief:
Throughout the pandemic, there was strong bipartisan support for federal relief funding to keep the child care sector afloat.
- As a result, 4,120 child care programs in Kansas received support, impacting up to 127,300 children.41
- These funds also allowed states to demonstrate what would be possible when equipped with additional resources. Funds have been used to support and stabilize the workforce through wage bonuses. Individuals in licensed facilities or license-exempt Head Start Programs working less than 20 hours per week are eligible for $1,250, and those working 20 or more hours per week are eligible for $2,500.42

Preschool Development Grant Birth Through Five (PDG B-5):
PDG B-5 is a competitive federal grant designed to improve states' early childhood systems. In their 2023 planning grant application, among other uses, Kansas noted that they would use funding to:
- Explore a Cooperative Family Governance model, which delegates power to families to be part of designing a responsive and accountable ECE system.
- Support the ECE workforce through a Child Care Workforce Accelerator, focusing on recruitment, retention, and sustainable growth and exploring a compensation reform plan based on the true cost of care.2
