In Virginia, federal and state early learning opportunities serve more than 70,686 children and families, or 12% of children birth through age 5.

High-quality early care and education (ECE) is proven to dramatically improve a child’s opportunities for a better future while offering parents greater job stability and overall economic security.

The Economic Impact
Access to affordable, high-quality child care can increase parental labor force participation and family economic stability. However, widespread problems finding and paying for child care adversely affect both state and national economies. As a direct result of child care issues, the national economy loses $122 billion annually in the form of lost earnings, productivity, and revenue. In Virginia: The estimated annual economic impact of the infant-toddler child care crisis: $3.1B.

There are several early learning programs that provide working families with access to high-quality, affordable ECE opportunities, but currently the demand for care far outweighs the supply, and funding constraints leave many eligible children unserved. Each of these programs has its own eligibility requirements, purpose, and service delivery model. Together they form a mixed-delivery system that supports parental choice and aims to meet children’s individual needs.

Early Care and Education (ECE) in Virginia Snapshot

Federal and State ECE Funding in Virginia

Accessibility

Many families struggle to find the care they need.
- **47%** of Virginia residents live in a “child care desert.”
- **Rural families and families with low incomes** are disproportionately represented among those who live in a “child care desert.”
- **3%** of children under age 3 receive early intervention services.

Affordability

The cost of ECE is too expensive for many families.
- The annual price of center-based infant care is **$15,450**, and home-based infant care is **$11,945**.
- Families receiving a CCDBG subsidy pay between **$0** and **$433** per month for one child in care.
- A two-parent household spends **10%** of their income on child care, while HHS defines spending over 7% to be a burden.

ECE Workforce

Early childhood educators have some of the lowest paying jobs in the United States, earning poverty-level wages.
- **$30,160** child care worker annual salary ($14.50 per hour).

Program Quality

Program quality varies substantially across and within states.
- **Met 5.9/10** of NIEER’s Quality Standards Benchmarks for state-funded pre-K programs. Only 5 states met all 10 benchmarks in 2022.
- **30%** of children received developmental screenings at 9, 18, and 30 months in the past year.

Federal funding is foundational to providing ECE.

Virginia received an additional **$1.1B** through COVID-19 relief.

COVID-19 Relief:
Throughout the pandemic, there was strong bipartisan support for federal relief funding to keep the child care sector afloat.
- As a result, **4,975** child care programs in Virginia received support, impacting up to **317,500** children.
- These funds also allowed states to demonstrate what would be possible when equipped with additional resources. Funds have been used to stabilize and support the early childhood sector, including: increasing payroll/salaries; strengthening employee benefits; assisting with rent, utilities, facility maintenance or improvements; and providing mental health support for children/families and employees.

**Preschool Development Grant Birth Through Five (PDG B-5):**
PDG B-5 is a competitive federal grant designed to improve states’ early childhood systems. In their 2023 planning grant application, among other uses, Virginia noted that they would use funding to:
- **Pilot a new Early Childhood Navigator role in two regions,** which will help new family child care and small child care providers become part of the publicly-funded ECE system and serve more children.
- **Expand the innovative FastTrack program,** which recruits and prepares ECE educators from nontraditional backgrounds to teach in child care.
